

GIU berlin Spring 2026

Software mobile development

Project requirements

The app must serve a useful purpose that users should use for daily tasks, life organization, or leisure. The minimum requirements are:

- User accounts and authentications (several types of users like regular and admin for example)
- Several screens with navigations (bottom, tabs, drawers...)
- Online Database (Firebase or any equivalent)
- Push notifications
- Device feature(s) such as camera and/or GPS.
- Error handling (connection issues, wrong inputs...)
- At least 3 features out of scope of the course.
- An AI component (either integrated within the app or using an API)
- Persistent storage, providers + stream providers, caching
- Strong UI and UX
